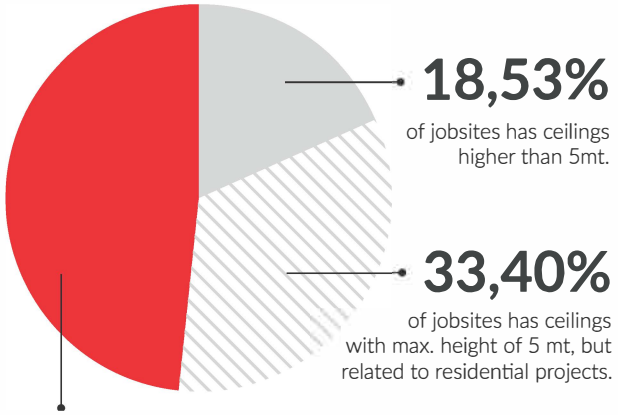
Leonardo HD

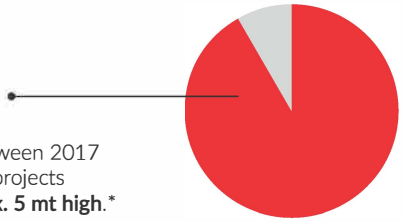
is not only a platform,
it is a revolution in safety
and productivity on the jobsite.



18,53%
of jobsites has ceilings higher than 5mt.

33,40%
of jobsites has ceilings with max. height of 5 mt, but related to residential projects.

48,07%
of jobsites has ceilings with max. height of 5 mt.*
Compatible with Leonardo HD.
*Introspective Market Research,
Global Construction Market Research Report 2024



92,72%
of scissor lifts sold between 2017 and 2023 are used in projects where **ceilings are max. 5 mt high**.*
*Introspective Market Research,
Global Scissor Lift Market Research Report 2024

In a market where most of the jobsites are below 5 mt height, why continue to invest in overpro-portioned 8-mt platforms, unsuitable for narrow spaces, which expose operators to risks of injury and loss of productivity?

100% Safe, 0% Risk

0 ladders, 0 scaffoldings. Works in spaces up to 5 mt height, covering the most part of jobsites. **Eliminates risks of falls** from traditional equipment, leading causes of occupational accidents.

Versatility Without Compromises

0° turning radius and 35% of overcome gradeability. Unlimited access to tight spaces, eliminating the temptation to use dangerous ladders.

Doubled Productivity, Halved Risks

One operator – one platform: unmatched autonomy and speed. Zero seconds to reposition means zero moments of risks. 50% of time saved compared to ladders and scaffoldings.

30 years of Reliability and Safety

Spare parts in 48 hours to minimize downtime and risks associated with sub-optimal equipment. **Equipment life of 30 years** guarantee a durable investment in the safety of your construction site.
